FOR IMMEDIATE RELEASE

Cybernetics Releases New iSAN® 4000 Storage Solutions

Add Storage And Implement New Backup And Disaster Recovery Policies With One Device.

February 15, 2013, Yorktown, Virginia – The Cybernetics iSAN® 4000 product line delivers speed, power, and flexibility, with up to 400,000 IOPS sustained and 1.2 GB per second throughput. Models are available with 8, 12, 16 or 24 bays, as well as single or dual controllers, and are scalable to fit even the most demanding enterprise virtual storage needs.

The iSAN® 4000 units are completely self-protecting via layered data protection, as well as encrypted, deduplicated WAN replication and a wide variety of backup configurations. Additionally, each unit provides true block level performance to servers and workstations through an intuitive management interface accessible via web browser.

Based in Yorktown, Virginia, since 1978, Cybernetics manufactures, supports, and services a complete family of disk-based storage and backup solutions. Cybernetics is recognized in the United States and around the world as a pioneer in data storage technology, specializing in industry-first features that vastly improve the performance of tape and disk subsystems.
