

FOR IMMEDIATE RELEASE

Cybernetics Releases High Performance Storage Models

SAN Storage solutions packed with features to save time and money.

February 15, 2013, Yorktown, Virginia – The Cybernetics iSAN® 2000 product line delivers speed, power, and flexibility tailored specifically to small- to medium-size businesses. Models are available with 8, 12, 16 or 24 bays, and offer up to 200,000 IOPS sustained and 500 MB per second throughput, depending on port configuration.

The iSAN® 2000 units provide true block level performance to servers and workstations through an intuitive management interface accessible via web browser, and are completely self-protecting via layered data protection, as well as encrypted, deduplicated WAN replication and a wide variety of backup configurations.

Based in Yorktown, Virginia, since 1978, Cybernetics manufactures, supports, and services a complete family of disk-based storage and backup solutions. Cybernetics is recognized in the United States and around the world as a pioneer in data storage technology, specializing in industry-first features that vastly improve the performance of tape and disk subsystems.
